Summary

7+ years in test automation across Salesforce CPQ/CLM, insurance, healthcare, education, eCommerce, and automotive domains. Expert in **Playwright** (Java, TypeScript, JavaScript), **Selenium WebDriver**, and **API testing** (Rest-Assured, Postman, Playwright API). Rearchitected a 3,100-script suite down to 1,600, cutting execution time by **35%**. Experienced in CI/CD integration, AI-assisted testing with **GitHub Copilot** and **Anthropic Claude**, and full in-sprint automation ownership. Targeting **Senior Test Engineer** and **SDET Lead** roles.

Technical Skills

Automation: Playwright (Java, TypeScript, JavaScript), Selenium WebDriver (Java)

API Testing: Rest-Assured, Postman, Playwright API, OVH-Venom (YAML), GraphQL

Languages: Java, TypeScript, JavaScript, Python (familiar), YAML

CI/CD & DevOps: GitHub Actions, Jenkins, Concourse CI, Docker

AI-Assisted Testing: GitHub Copilot (Chat, CLI), Anthropic Claude (Desktop, CLI, MCP), Applitools Preflight

Frameworks: Page Object Model, Component Object Model, Hybrid, BDD/Cucumber, TestNG

Test Management: Jira, Zephyr Scale, Xray, qTest

Other: Gatling (performance), axe-core (accessibility), Pact (contract testing), Salesforce, AWS

Domain Knowledge: Salesforce CPQ/CLM, Insurance, LIMS, Education (Assessments), eCommerce (Shopify), Automotive

Work Experience

RecruitSmart

Sr. QA Engineer | Nov 2024 – Present

Conga — CPQ & CLM Approvals

Playwright (Java), Jenkins, GitHub Copilot, qTest, Salesforce

- Rearchitected a legacy suite from **3,100 to 1,600 scripts**, eliminating overlapping flows and replacing brittle locators — **cut execution time ~35%**.
- Delivered full **in-sprint automation** across UI, API, and E2E CPQ/CLM flows: cart operations, price-list validations, rule entry, multi-step approval chains, and ad-hoc business processes.
- Automated enterprise client flows — **NOMURA** (custom CPQ approvals) and **multi-language validation** (EN → FR) via JSON-driven localisation across UI and API layers.
- Designed **five GitHub Copilot Chat agents** (Planner, Code-Gen, Debug, Git-Review, Clean) to accelerate test implementation and enforce code standards.
- Contributed to improving a **qTest-integrated Copilot workflow**: agent retrieves steps from qTest, navigates the app via Playwright MCP, identifies locators, and generates test code.
- Owned QA end-to-end — sprint planning, go/no-go calls, and mentoring junior engineers on the automation framework.
- Managed complex **Salesforce + Conga iframe** environments requiring divergent locator strategies across platforms.

Trigent Software Pvt Ltd

Sr. QA Engineer | Jun 2023 – Nov 2024

Socotra — Enterprise Insurance Core

Apr 2024 – Nov 2024

Playwright (Java), Jenkins, OVH-Venom, Postman

- Automated policy management, endorsement, and product configuration workflows in Playwright (Java).
- Implemented API automation with OVH-Venom (YAML); integrated suites into Jenkins CI/CD for scheduled regression.

Tempus LIMS — AI-Enabled Precision Medicine

Jun 2023 – Mar 2024

Playwright (JS/TS), Concourse CI, AWS, Zephyr Scale

- Automated lab workflows (sample management, data entry, analysis, reporting) across tumor, normal, DNA, and RNA sample types.
- Operated within a strict Concourse CI PR process: green build + two reviewer approvals before merge to master.

Adeptpros IT Solutions Pvt Ltd

QA Engineer | Jun 2021 – May 2023

Woodcock Johnson V — Riverside Insights (Education)

Mar 2022 – May 2023

Playwright, Selenium (Java), TypeScript, GitHub Actions, Docker

- Automated complex assessment logic (Basal/Ceiling rules, timed interactions, audio/video) using Playwright and Selenium; onboarded and mentored new QA team members.

ESN Sports — Shopify eCommerce, Germany

Dec 2021 – Feb 2022

Playwright (TypeScript), Xray

- Built E2E automation including TOTP authentication flows (NPM libraries) and Shopify API-based order validation.

BDI-3 — Riverside Insights (Early Childhood Assessment)

Jun 2021 – Nov 2021

Protractor (JavaScript), Jira

- Automated assessment UI and scoring workflows for the Battelle Developmental Inventory, 3rd Edition — a standardised early childhood developmental assessment covering cognitive, motor, and communication domains.

SHAP Pvt Ltd

QA Engineer | Feb 2019 – May 2021

KIA Motors Parts Management System

Selenium (Python), MySQL

- Sole QA on a greenfield automotive portal — designed all test cases covering stock management, part tracking, ED coating, special orders, and dispatch flows.
- Initiated a Selenium (Python) automation proof-of-concept — the first automation effort on the project.

Portfolio & Learning Projects

- **Contract Testing (Pact, TypeScript):** Consumer-provider contracts with GitHub Actions CI integration.
- **Accessibility Testing (@axe-core/playwright):** 11 modules, 59 tests across GreenKart, TodoMVC, and OrangeHRM.
- **CI/CD Test Results Dashboard:** GitHub Pages — KPI cards, Chart.js trend charts, flaky test leaderboard, environment filtering.
- **AI Failure Analyser (In Progress):** Post-test GitHub Actions step classifying failures via Claude/OpenAI API.

Education

Bachelor of Technology — Mechanical Engineering

SRIT Engineering College, JNTU Anantapur | 2016

v2.2 | 2026-07-16
